Index

A

Adrenalectomy, effect on liver pentose phosphate-metabolizing enzyme activity, 345.
ALLISON, J. B., R. W. WANNEMACHER, JR., W. L. BANKS, JR. AND W. H. WUNNER. The magnitude and significance of the protein reserves in rats fed at various levels of nitrogen, 383.
ALUMOT, EUGENIA. See Nitsan, Zafrira, 179.
ALVARES, A. P. See Hendrickson, R. F., 65.
Amino acid(s) diet, effect of phytic acid on availability of zinc in, compared with casein diet, in chicks, 145.
— — diets, glutamic acid and arginine requirement for high growth rate in rats fed, 305.
— —, sulfur-containing and dietary protein, influence on plasma and liver lipids of mice, 10.
Aminopterin, effect on fetal development and nucleic acid metabolism in rat, 288.
AMMERMAN, C. B., L. R. ARRINGTON, A. C. WARNICK, J. L. EDWARDS, R. L. SHIRLEY AND G. K. DAVIS. Reproduction and lactation in rats fed excessive iodine, 107.
ANDERSON, R. L., AND S. B. TOVE. Effect of dietary fatty acids on assimilation of fatty acids by adipose tissue in vitro, 244.
Antioxidants, synthetic, ability to substitute for vitamin E in reproduction in the rat, 395.
Arginine-lysine antagonism in the chick, 313.
— requirement for high growth rate of rats fed amino acid diets, 305.
ARRINGTON, L. R. See Ammerman, C. B., 107.
ARSENIS, CHARALAMPOS. See Yang, Chung Shu, 167.
Ascorbic acid, effect on metabolism of connective tissue in guinea pigs, 27.
ASHLEY, L. M. See Woodall, A. N., 125.
Assays, microbiological and enzymatic, of riboflavin analogues, 167.
AYLWARD, SARA. See Coniglio, John G., 265.

B

Bacteria, enterococci and coliform, in intestine of coprophagy-prevented rats, 155.
BAERTL, JUAN M. See Graham, George G., 71.
BANKS, JR., W. L. See Allison, J. B., 383.
Beef, irradiated, and prothrombin time in monkey, 259.
BELL, M. C. See Wright, P. L., 49.
BELL, M. D., B. C. DIGGS, R. S. LOWREY AND P. L. WRIGHT. Comparison of Mo^{99} metabolism in swine and cattle as affected by stable moylbdenum, 367.
BENEVENGA, N. J., W. J. STIELAU AND R. A. FREEDLAND. Factors affecting the activity of pentose phosphate-metabolizing enzymes in rat liver, 345.
Bengal gram *(Cicer arietenum)*, effect on induced high levels of cholesterol in tissues and serum of albino rats, 201.
BERGAN, J. G. See Draper, H. H., 395.
Biotin-deficient rats, utilization of co^{58}-labeled vitamin B_{12}, 255.
—, interrelationship with vitamin B_{12} in rats, 249.
Blood volume and various blood constituents, effect of fasting and refeeding, in swine, 295.
BOARO, A. V. See Draper, H. H., 395.
Body composition and weight, effect of protein deficiency during gestation and lactation in rat, 38.
— —, effect of artificial diet in neonatal rat, 100.
Bone density measurements throughout the life cycle of the rat, 373.
BOUSSINGAULT, JEAN BAPTISTE — a biographical sketch, 1.
BRADLEY, WILLIAM B. See Hepburn, Frank N., 305.
BRENT, B. E. See Kornegay, E. T., 295.
BROWN, R. R. See Yess, Norma, 229.
BUNN, CLARA R. See Matrone, Gennard, 215.

C

Cabbage supplement, effect on mortality of guinea pigs inoculated with *Salmonella typhimurium*, 191.
Cadmium, dietary, influence of level and supplemental zinc on cadmium toxicity in the bovine, 205.
Calcium acetate, effect on parathyroids of rat, 97.
— and water, intestinal transport of, from solutions recycled through healed gut loops in dogs. 118.
— intake, effect on bone density of rats through 2 generations, 373.
— metabolism and skeletal dynamics of laying pullets, 20.
—, phosphorus, and magnesium relationships in ovine urolithiasis, 185.
— utilization by chicks as influenced by nutritional and endocrine variations, 58.
Calorie and protein intake, effect on nitrogen retention in infantile malnutrition, 71.
"Carbohydrate-free" diets, factors affecting utilization of by chick. I. Level of protein, 322.
— — — factors affecting utilization of, by chick. II. Level of glycerol, 327.
Cariogenicity in white rats, effect of mineralization of a cereal diet on, 272.
Carotene serum and vitamin A levels, response to dietary protein and vitamin A in preadolescent children, 389.
Casein diet, effect of phytic acid on availability of zinc in, compared with amino acid diet, in chicks, 145.
Cattle and swine metabolism of Mo^{99}, comparison of effect of stable molybdenum, 367.
Cereal(s) diet, effect of mineralization of on cariogenicity in white rats, 272.
— mixtures, effects of moisture content on nutritional value, in rats, 331.

CHALUPA, WILLIAM, J. L. EVANS AND M. C. STILLIONS. Metabolic aspects of urea utilization by ruminant animals, 77.
Chicken(s), calcium metabolism and skeletal dynamics of laying pullets, 20.
—, calcium, strontium and phosphorus utilization as influenced by nutrition and endocrine variations, 58.
—, effects of dietary vitamin A acetate on tissue tocopherol, 113.
—, effect of phytic acid on availability of zinc in amino acid and casein diets, 145.
—, — — glycerol level on utilization of "carbohydrate-free" diets by, 327.
—, — — protein level on utilization of "carbohydrate-free" diets by, 322.
—, interrelationships between dietary levels of sodium, chlorine and potassium in, 361.
—, iron deficiency in (Letter), 93.
—, kidney beans and effectiveness of vitamin E in prevention of nutritional muscular dystrophy in, 283.
—, lysine-arginine antagonism in, 313.
—, overcoming inhibition of intestinal proteolytic activity caused by raw soybean in, 179.
Chick pea *(Cicer arietenum)* effect on induced high levels of cholesterol in tissues and serum of albino rats, 201.
Children, preadolescent, metabolic patterns in. XI. Response of vitamin A and carotene serum levels to dietary protein and vitamin A, 389.
CHIU, MEI. See Draper, H. H., 395.
CHIU, MEI. See Lee, D. J., 401.
Chlorine, sodium and potassium dietary levels, interrelationship, in chicks, 361.
Chlortetracycline, effects on body weight gain and intestinal urea hydrolysis of rats, 65.
Cholesterol, dietary, and essential fatty acid deficiency, effect on liver ubiquinone levels in the rat, 401.
— in tissues and serum of albino rats, effect of Bengal gram on induced high levels of, 201.
—, liver, of mice, and dietary protein level, 10.
— -lowering effect of commercial diet fed to germfree and conventional rats, 277.
Cicer arietenum, effect on induced high levels of cholesterol in tissues and serum of albino rats, 201.
CLIFTON, C. M. See Powell, G. W., 205.
Colostral and milk components, effect of feeding on cessation of intestinal absorption of large molecules (closure) in neonatal pigs, 43.
CONIGLIO, JOHN G., JAMES T. DAVIS AND SARA AYLWARD. Metabolism of ethyl arachidonate-1-C^{14} in rats fed complete or fat-free diets, 265.
Copper status of rat, effect on copper-molybdenum-sulfate interaction, 31.
Coprophagy prevention, effect on intestinal microflora, in rats, 155.
CORDANO, ANGEL. See Graham, George G., 71.
Cortisone and liver pentose phosphate-metabolizing enzyme activity in the rat, 345.
COWGILL, GEORGE R. Jean Baptiste Boussingault — a biographical sketch, 1.
CRAMER, C. F. In vivo intestinal transport of calcium and water from solutions recycled through healed gut loops in dogs, 118.
Creatinuria and dietary fat level, in rat, 351.
CSALLANY, A. SAARI. See Draper, H. H., 395.
Cysts, parathyroid, dietary production of in the rat, 97.
CZAJKA, D. M. See Dymsza, H. A., 100.

D

DANIEL, LOUISE J. See Gray, Louise F., 31.
DAVIS, G. K. See Ammerman, C. B., 107.
DAVIS, JAMES T. See Coniglio, John G., 265.
DAVIS, P. N., L. C. NORRIS AND F. H. KRATZER. Letter — Iron deficiency in chicks, 93.
Development, fetal, effect of aminopterin on, in rat, 288.
Diabetes and liver pentose phosphate-metabolizing enzyme activity in the rat, 345.
Dieldrin toxicity, effect of level of dietary protein on, in rat, 136.
Diet(s), amino acid, glutamic acid and arginine requirements for high growth rate in rats fed, 305.
—, artificial, influence on weight gain and body composition of neonatal rat, 100.
—, "carbohydrate-free," factors affecting utilization of by chicks. I. Level of protein, 322.
—, "carbohydrate-free," factors affecting utilization of by chicks. II. Level of glycerol, 327.
—, casein-gelatin, with excess L-lysine, bone abnormalities and reduced growth in chicks, 313.
— commercial, cholesterol-lowering effect in germfree and conventional rats, 277.
—, effect on *Salmonella typhimurium* infection in guinea pig, 191.
—, fat-free, and metabolism of ethyl-arachidonate-1-C^{14} in rats, 265.
—, —, cholesterol, and liver ubiquinone levels in rat, 401.
—, purified, study of dietary factors in for ruminants, 215.
—, urea-alfalfa, effect on propionate and butyrate in rumen fluid of lambs, 215.
DIGGS, B. C. See Bell, M. D., 367.
Dihydrotachysterol, dietary, effect on parathyroids of rat, 97.
DODDS, MARY L., AND ROSE LAWE. Mineralization of a cereal diet as it affects cariogenicity, 272.
Dog(s) food, effect of moisture content on nutritional value, in rats, 331.
—, intestinal transport of calcium and water from solutions recycled through healed gut loops in, 118.
— milk, passage of selenium into, 340.
DRAPER, H. H., J. G. BERGAN, MEI CHIU, A. SAARI CSALLANY AND A. V. BOARO. A further study of the specificity of the vitamin E requirement for reproduction, 395.
DRAPER, H. H. See Lee, D. J., 401.
DYMSZA, H. A., D. M. CZAJKA AND S. A. MILLER. Influence of artificial diet on weight gain and body composition of the neonatal rat, 100.

E

Edema, cellular, in livers of rats ingesting dieldrin, 136.
EDWARDS, J. L. See Ammerman, C. B., 107.

EHRLICH, SARAH T., B. R. FARTHING AND DOROTHY S. MOSCHETTE. Metabolic patterns in pre-adolescent children. XI. Response of vitamin A and carotene serum levels to dietary protein and vitamin A, 389.
ELCOMBE, A. M. See Renner, Ruth, 327.
Endocrine and nutritional variations, influence on calcium, strontium and phosphorus utilization by chicks, 58.
Enzymes, amino acid-activating, activity in tissues from protein-depleted rats, 173.
—, pentose phosphate-metabolizing, in rat liver, factors affecting the activity of, 345.
D-Erythroflavin, biological activity as a riboflavin analogue, 167.
DL-Ethionine and dietary protein concentration, effects on soluble proteins of rat liver of changes in, 335.
Ethyl arachidonate-1-C^{14} metabolism in rats fed complete or fat-free diets, 265.
EVANS, J. L. See Chalupa, William, 77.
Ewe(s), gestating, effects of dietary α-tocopherol and selenium on Se^{75} metabolism, 49.

F

FARTHING, B. R. See Ehrlich, Sarah T., 389.
Fasting and refeeding, effect on body weight, rectal temperature, blood volume and various blood constituents in swine, 295.
Fat(s), saturated, digestibility by mice, 237.
—, —, toxicity of in mice, 237.
Fatty acid(s) assimilation of by adipose tissue in vitro, effect of dietary fatty acids on, 244.
— —, dietary, effect on assimilation of fatty acids by adipose tissue in vitro, 244.
— —, essential, deficiency, effect on liver ubiquinone levels in rat, 401.
— —, lipid, and tocopherol requirement of rat, 351.
— —, polyunsaturated, metabolism in short-term studies with rats, 149.
Fish, salmonoid, nutrition of. XIII. α-Tocopherol requirement of chinook salmon, 125.
FITZGERALD, ROBERT J., BENGT E. GUSTAFSSON AND ERNEST G. MCDANIEL. Effects of coprophagy prevention on intestinal microflora in rats, 155.
Fluoride, effect on metabolism of connective tissue in guinea pigs, 27.
Folic acid antagonist, aminopterin, effect on fetal development in rat, 288.
— — —, aminopterin, effect on nucleic acid metabolism in rat, 288.
FORBES, R. M. See Likuski, H. J. A., 145.
FREEDLAND, R. A. See Benevenga, N. J., 345.
Fructose, high, effect on pentose phosphate-metabolizing enzyme activity in rat liver, 345.

G

GAETANI, S., A. M. PAOLUCCI, M. A. SPADONI AND G. TOMASSI. Activity of amino acid-activating enzymes in tissues from protein-depleted rats, 173.
Gestation and lactation, protein deficiency during and effect on body weight and composition of offspring of rats, 38.
Glutamic acid requirement for high growth rate of rats fed amino acid diets, 305.
Glycerol level, effect on utilization of "carbohydrate-free" diets by chick, 327.
GRAHAM, GEORGE G., ANGEL CORDANO AND JUAN M. BAERTL. Studies in infantile malnutrition. III. Effect of protein and calorie intake on nitrogen retention, 71.
GRAY, LOUISE F., AND LOUISE J. DANIEL. Effect of copper status of the rat on the copper-molybdenum-sulfate interaction, 31.
Growth, effect of artificial diet in neonatal rat, 100.
—, — on bone density of rats through 2 generations, 373.
—, rat, effects of dietary selenium, methionine, fat level and tocopherol on, 351.
— rate, high, glutamic acid and arginine requirements for in rats fed amino acid diets, 305.
GUHA, A. See Roels, O. A., 161.
Guinea pig, influence of dietary factors upon *Salmonella typhimurium* infection in, 191.
GUSTAFSSON, BENGT E. See Fitzgerald, Robert J., 155.
